

Cabling Solutions

Advanced Teletronics Repairs and Service Limited provides customized Structured Cabling plans with the ability to expand, upgrade and reconfigure your wiring needs to meet current and future business demands. We create solutions to meet our customer's need for professional, high quality network, voice and data cabling.

Our main goal is total customer satisfaction through the highest quality workmanship. We take great pride in our phone system installation, testing and certification procedures. We perform the entire range of telephone wiring jobs from simply adding jacks, to relocating phone systems to brand new installations.

We offer comprehensive start to finish structured cabling solutions, We will handle all wiring, jack installation, phone system set-up and testing. Many companies only perform selected jobs, such as running cables, but are unable to complete the whole job – often requiring you to hire several companies for cabling, connecting jacks or equipment. Advanced Teletronics Repairs and Service can perform every part of the job for data and voice wiring including all cable, jacks, termination and testing. You deal with a single company, avoiding delays, confusions and extra expense.
